5) MILCOIN AQUISITION & DEVELOPMENT OF REAL ESTATE

acquisition and the development of real estate and entertainment assets is integrated into 16 companies on US stock market and one cryptocurrency. The main element of real estate is resorts based on hobbies, which is on what people don't save money.

People are very curious about TV programming and people will want to be part of it ... as illustrated by the photos on the link below, demonstrating that people are waiting for weeks in the rain and snow to get into TV Studios.

In each resort will be a lot of people of the same hobby and some of them famous, rich, controversial, wealthy, funny, etc ... and because people love to watch and to be part of creating TV programming, and because PEOPLE LOVE TO COMPETE AND WATCH OTHER PEOPLE TO COMPETE, there will be TV programs created, such as: News Programs, Talk Shows, Game Shows, Reality Shows, Scripted Shows, Unscripted Shows, All kind of competitions, Children Programming, Educational Programming, Documentaries and ... and MOVIES ...

Each resort will generate at least 6 hours of TV programming per day, therefore each resort will generate programming for one (1) TV Channel that will be connected to cable and satellite network worldwide and reach at the minimum these 89 million people who has hobby of playing video games ... however there are almost 2 billion people worldwide playing games and obviously there will many more viewers than 89 million who has that as a hobby.

Because 24 hours of programming is 8 hours repeated 3 times,

Because 60 minutes of programming is 44 minutes of programming and 16 minutes of commercials,

Because, 16 minutes X 24 Hours X 3 commercials per minute = 1,152 commercials per 24 hours.

Because the cost of connecting channel cost 50% of advertising time, only 576 commercials will be available for LatAm to sell on these channels for 24 hours.

Commercials are sold 4 cents per viewer. 89 million viewers times 4 cents are \$3,560,000.00 per commercial.

\$3,560,000.00 times 576 commercials per day is equal to STAGGERING \$2,050,560,000.00 USD ... TWO BILLION DOLLARS PER DAY ... FROM THE TV PROGRAMMING GENERATED ONLY FROM ONE RESORT BASED ON HOBBIES AND ENTERTAINMENT AND MEDIA, WHICH MEANS CREATION OF TV PROGRAMMING.
